

Greenwings Offices obtained a final BREEAM certificate with an increased score compared to its interim certificate.

Warsaw, May 25th 2015

Greenwings Offices was granted a final Breeam certificate for its office building at ul. 17 Stycznia. The final assessment was provided by Grontmij Polska.

Greenwings offices was already interim certified on a Very Good level. Although the final Breeam certificate has confirmed its Very Good ranking the final score is better than the interim one. This due to a post building check of the initially provided design and concepts and the manner in which the building was construed.

Dr. Inz. Marcin Gawronski who was responsible at Grontmij for the final assessment commented : *„When one compares Greenwings Offices with other offices which were rated Very Good, Greenwings differentiates itself by the way the building process was implemented and how the whole development was provided for by OKRE, the abundance of daylight in the offices thanks to a well thought through elevation design and absence of other buildings in its vicinity as well as facilities such as a bicycle room, locker rooms and showers”.*
